Let op de krampachtige bewoording: 'biological research facilities' terwijl het hier echt gaat om levensgevaarlijke experimenten die men in eigen land niet kan uitvoeren onder de geldende regels. Volgens het vnhandvest is dit al een legitieme reden tot interventie.

THE GHOST OF KYIV

Disinformation on Ukrainian fighter pilot who was said to have shot down 40 enemy planes. Ukrainian officials admitted that the ghost, in fact, never existed. The Ghost of Kyiv is one of the most successful pieces of propaganda promoting the nation's fighting forces and lifting morale. Although Ukrainian officials and former president Petro Poroshenko promoted the myth, the air force warned people to not "neglect the basic rules of information hygiene" and to "check the sources of information, before spreading it."
